Great news for our valued providers, like you. **Effective March 2024, MetroPlusHealth will be partnering with Verisys to simplify our credentialing process.**

Verisys is an industry leader in provider data management, credentialing, and sanction monitoring, delivering comprehensive profiles of verified provider data. Hundreds of large health care organizations and related stakeholders partner with Verisys to streamline processes, accelerate verifications, and enable compliant, aligned provider networks.

This new partnership will make the following credentialing functions seamless for our provider network:

- Credentialing verification services for providers and facilities undergoing the initial credentialing or recredentialing process. This includes activities such as:
 - Reviewing and retrieving New York State CAQH ProView applications/MetroPlusHealth Organizational Provider applications;
 - Gathering supporting documentation; and
 - Primary Source Verification of provider information, such as board certification, licensure, etc.

If you are undergoing the credentialing or recredentialing process with us, you should expect outreach from Verisys to assist with the above activities.

We look forward to offering you these enhanced services and to make it even easier to work with MetroPlusHealth.

Sincerely,

Denise Smith
Vice President of Provider Network Operations
