

NYC Health + Hospitals/Elmhurst Welcomes Dr. Kristina Emeghebo, Pediatric Hematology Specialist

We are pleased to welcome **Dr. Kristina Emeghebo** to our Pediatrics Team!

Dr. Emeghebo received her MD from Morehouse School of Medicine, completed her Pediatric Residency at Nassau University Medical Center, and her Fellowship in Pediatric Hematology/Oncology at Northwell-Cohen Children's Medical Center. She is board certified in both General Pediatrics and Pediatric Hematology/Oncology. Her research and publications focus on sickle cell disease, patient- and family-centered care, and disparities in healthcare. She also directly manages inherited chronic and acute hematologic illnesses for children in New York City.

Scope of Practice Includes:

- Anemias: iron deficiency, hemolytic, aplastic, megaloblastic
- Hemoglobinopathies: sickle cell, thalassemias
- Bleeding disorders: hemophilia, von Willebrand, platelet function disorders
- Clotting disorders: thrombophilia, DVT, pulmonary emboli
- Bone marrow failure syndromes: Fanconi, Diamond-Blackfan
- Immune-related conditions: ITP, autoimmune hemolytic anemia
- Interpretation of blood counts, coagulation, genetic and molecular studies
- Anticoagulation and thrombolytic therapy
- Use of clotting factor concentrates, iron chelation, immunosuppressive therapy
- Screening and counseling for inherited blood disorders
- Monitoring long-term complications of treatment
- Transitioning patients to adult hematology care
- Providing psychosocial support with counselors, social workers, community health workers, and educators
