INTRODUCTION

We are pleased to provide the ***MetroPlusHealth Formulary*** as a useful reference and informational tool. This document can assist medical providers in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This document is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the document is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by either a drug class or disease state. All drugs listed were selected to be on this formulary. Brand-name drugs are capitalized. Generic drugs are listed in lower-case italics. This formulary document lists all dosages, strengths and formulations of each drug that is covered.

Drugs, dosages, strengths, and formulations not listed are considered non-formulary. MetroPlusHealth only covers drugs from manufacturers participating in the Federal Medicaid drug rebate program.

Drugs represented in this document may have varying cost to the plan member based on the plan's benefit structure. Generic medications typically are available at the lower cost, brand-name medications on the document will generally cost more than generics. Generics should be considered the first line of prescribing subject to applicable rules.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. An important consideration for generic substitution is the knowledge that all approvals of generic drugs by the FDA since 1984, and many generic approvals prior to 1984, have a showing of bioequivalence between the generic versions and the reference brand product. To gain FDA approval:

1. The generic drug must contain the same active ingredient(s), be the same strength and the same dosage form as the brand-name product.
2. The FDA has given the generic an "A" rating compared to the branded product indicating bioequivalence and has determined the generic is therapeutically equivalent to the reference brand. The ratings of generic drugs are available by referring to the FDA reference, *Approved Drug Products with Therapeutic Equivalence Evaluations* (Orange Book).

When the above two criteria are met, a generic can be substituted with the full expectation that the substituted product will produce the same clinical effect and safety profile as the prescribed product. Drug products that have a narrow therapeutic index (NTI) can also be guided by these principles. It is not necessary for the health care provider to approach any one therapeutic class of drug products (e.g., NTI drugs) differently from any other class, when there has been a determination of therapeutic equivalence by the FDA for the drug products under consideration. Also, additional clinical tests or examinations by the physician are not needed when a therapeutically equivalent generic drug product is substituted for the brand-name product.

OVER-THE-COUNTER DRUG COVERAGE

MetroPlusHealth covers selected over the counter (OTC) products. You are encouraged to prescribe them when clinically appropriate. Not every OTC item made by every manufacturer is covered. Furthermore, not all formulations and/or package sizes are covered. Quantities may also be limited based on acute/episodic vs. chronic/maintenance uses. For the most up-to-date list of covered OTC products, please refer to [Medicaid Pharmacy List of Reimbursable Drugs](#).

OPIOID DRUG MANAGEMENT

MetroPlusHealth limits "new" opioid analgesic prescriptions to a 7-day supply per New York State Public Law Section 3331,5. (b), (c). A new prescription means that a patient has not had an opioid medication filled under MetroPlusHealth in the preceding 90 days or had one short-acting opioid at < 50 morphine milligram equivalents (MME) per day in the previous 90 days. New prescriptions for more than 7-day supply will require Prior Authorization. For your reference, medications which are subject to this limitation are identified in the document by **7 DS**.

The quantity of opioid products covered (including those that are combined with acetaminophen, aspirin or ibuprofen) will be limited to up to 90 morphine milligram equivalents (MMEs) per day based on a 30-day supply. Members may be subject to additional quantity restrictions, including a limit of 90 days of treatment per 365 days.

For additional information regarding the New York State requirements for opioid prescribing, please visit the New York State Department of Health Bureau of [Narcotic Enforcement](#).

OPIOID SUBSTANCE USE DISORDER AGENTS

Effective October 1, 2021, opioid substance use disorder medication coverage is dictated by the New York State Department of Health Single Statewide Medication Assisted Treatment (MAT) Formulary. For more information and a list of medications, please visit MAT Statewide Formulary [List of Medication Assisted Treatment Agents](#)

SPECIALTY GUIDELINE MANAGEMENT

SGM is our utilization management program that helps ensure appropriate utilization for specialty medication based on currently accepted evidence-based medicine guidelines. SGM is designed to help ensure safety and efficacy while preventing off-guideline utilization. Medications which may be included in the SGM program are identified in the document as **SGM** for your reference. Prescribers may call 1-866-814-5506 to enroll patients in Specialty Guideline Management.

PLAN DESIGN

This document represents a closed formulary plan design. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Prior Authorization, Quantity Limits, Step Therapy, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria.

Drugs that require a Prior Authorization are indicated in the document by **PA**. If a drug requiring prior authorization is desired for medical management of a patient, the [General Medication Prior Authorization Form](#) can be found on the MetroPlusHealth website.

Drugs that require Step Therapy authorization for coverage are indicated with **ST**. Step Therapy requires that drugs be used in a specific prescribing order.

Drugs that have dispensing quantity limitation are indicated in the document by **QL** along with the limits noted in the parentheses. Drugs are designated with a QL because they are typically not taken on a regular schedule and/or because of potential safety and utilization concerns.

The Quantity Limit program provides for a maximum quantity of drug product that a member may receive per prescription and/or over a specific period of time. Many drug products on the *MetroPlusHealth Formulary* have quantity limits based upon the dosage described in product labeling.
